- Was good to see another things from a other side. I have learned a lot from the course very interest in history from the course.
- Actually, I liked the idea to write my own story, so overall this class made me more interested in the subject. I liked your stories from the U.S.
- This class especially got me thinking about how my soft skills affect my daily day. A great speaker and explainer had me thinking differently about some things and it came across real helpful. Other instructors had like a better understanding of where we are as [he] has been living the life kind of like us here on the street with similar codes and morals. Another thanks to all our instructors. Big up to my guy!
- It was very good, and I learned a lot about soft skills I can use on the inside and outside.
- It was very important to learn all this, especially leadership, and the differences in values and principles and that you can lock up a man's body, but you can't lock up his mind! And only our self can free ourself from mental slavery.
- I like it all. Your life experience. Some made it, some was just smart for the beginning in their life, how ya learning us to handle different situations. How ya learning us to stay positive, and to have self-control.
- Loved the course, very inspiring instructors. Learned a lot of skills I can use in real life practice.
